To not enter 8/1/90 AB
In response to the Board's action dated 11/30/89, Applicant amends his claims. The amended claims are provided by way of a five page document enclosed herewith and entitled AMENDED CLAIMS in Serial No. 06/787,692.

The amended claims include new claims 145 and 146; which new claims were substituted for cancelled claims 143 and 144.

Applicant notes that the action from the Board is not to be considered a Final Action.

REMARKS

With respect to the allowability of claims 139-142, Applicant notes that -- by his amendments -- he has obviated what appears to constitute a key concern of the Board; which concern is expressed in lines 3-17 of page 8 of its action.

Moreover, in regard to the possible obviousness of amended claims 139-142 over Franke, Applicant notes that Franke's teachings relate to an SRC-type inverter means which, in contrast with the claimed combinations, is driven as opposed to being self-oscillating.
